

Metamorphic Transformation of Your Drinking Water!
The Beyond O₂ Exclusive "Q-Stream Chamber"TM
The Ultimate Home Drinking Water Filtration System

Beyond O₂'s *exclusive* 9-Stage Purification / Q-Stream ChamberTM (Quintessence Streaming) is the hydration foundation science to the blessings found in Beyond O₂ Premium Alkaline Oxygen Water Filtration System. As your purified water streams through this final Chamber phase, it's metamorphically transformed like that of a caterpillar becoming a butterfly. It becomes Beyond O₂! ...becoming *natures best way to* pure, crisp, deliciously hydrating, alkaline/ion enhanced, thirst quenching experience.

It is through this natural science that we compress a thousand years of time found in the freshness and purity of glacier waters into a few seconds of time—transforming your water into a naturally enriched ionic alkaline mineralized thirst quencher—like having a natural mountain stream right under your kitchen sink!

Your Beyond O₂ Love-Streaming Water Filtration Process:

Under its own natural pressure (without electricity of any kind), your water streams through several uniquely designed streaming filtration chambers. Like a gentle, bubbling flowing stream, we first lovingly bring it back to its naturally pure clean and crisp alpha state of the ultimate cleanliness and freshness. Like a flowing stream cleans water naturally, we begin by removing the largest particulates...all the way down to the fifth and final chamber where we remove any remaining sub-micron particles and toxins (This unique technique is the same utilized for desalinating ocean drinking water, and a process of water purification approved by the FDA.)

Now that your water is ultra-clean through the 9 stage stream-chamber filters, (where we have removed toxins and particulates as noted below), the water gently travels through our final Q-Stream ChamberTM. As the water streams through this chamber, embedded with soluble coral and volcanic rock, natural trace minerals calcium, potassium and magnesium are infused, creating the metamorphic blessings found only in Beyond O₂ Premium Alkaline Oxygen Water. This metamorphic transformation naturally raises your water's pH to around 9.5 Alkalinity, making it supremely bio-wettable for optimum cellular hydration. Also, by naturally infusing minerals in this streaming way, your water's alkalinity infusion lasts years versus days, as in other processes.

Impurities Filtered by Five Stream-Chamber Filtrates: Impurities ranging from pharmaceuticals, fluorides, aluminum, sands, dirt, rust from the water pipes, insects, asbestos fiber, coli, unpleasant orders of chlorine that was used as a disinfectant and heavy chlorine by-products such as chloramines, THM, and TCE; and finally, through the RO chamber, wide spectrum of impurities including various kinds of harmful chemical substances such as bacteria, virus, cancerous heavy metals, phenols, pesticides, synthetic detergents, pipe waste, industrial waste, radioactive contaminated materials down to 0.0001 micron (25,400 microns = 1 inch).
